Q. 'Mount Ruang' which was in the news recently, is situated in-

a Malaysia

b Indonesia

c Cambodia

d Vietnam

Answer **b**

EXPLANATION

- Indonesia witnessed a series of eruptions from Mount Ruang, a stratovolcano located in North Sulawesi Province. The eruptions occurred on Tuesday, April 16, and continued four times on Wednesday, April 17, according to Indonesia's volcanology agency.
- The falling debris from the volcano was hazardous as it could cause a tsunami. Meanwhile, rescue teams raced to the site on Thursday, April 18, to evacuate thousands of people.
- The Indonesian government raised alerts to the highest order in a four-tiered system. Authorities have issued tsunami warnings as a result of these eruptions.
